Experiment No. 7

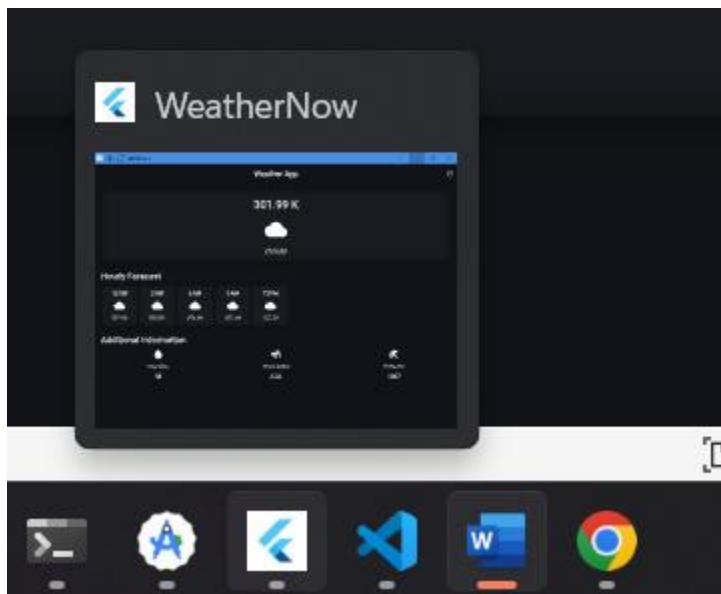

To write meta data of your Weather-app PWA PWA

Aim:- To write meta data of your Weather-app PWA in a Web app manifest file to enable “add to homescreen feature”.

Theory:

To enable the "Add to Home Screen" feature for your Weather App PWA, create a `manifest.json` file with essential metadata including `name`, `short_name`, `start_url`, `display` mode (standalone/fullscreen), `theme_color`, `background_color`, multiple resolution `icons`, and a `description`, then link it in your HTML using `

Output :

Conclusion : We successfully write meta data of your Weather-app PWA in a Web app manifest file to enable “add to homescreen feature”.
